## Lasertech Floorplans Named Official Interpreter of BOMA International's Floor Measurement Standards

WASHINGTON, D.C.—The Building Owners and Managers Association (BOMA) International has named Lasertech Floorplans as the exclusive consultant for interpretations of the BOMA floor measurement standards.

BOMA has a long history of developing and promulgating standards for measuring space in office buildings. The latest version of this standard is the *BOMA/ANSI Z65.1-1996 Standard Method for Measuring Floor Area in Office Buildings*. BOMA has also partnered with the Society of Industrial and Office Realtors (SIOR) to produce the *BOMA/SIOR Standard Method for Measuring Floor Area in Industrial Buildings*. Both of these standards are widely used in the marketplace and BOMA receives frequent calls related to these documents.

Lasertech Floorplans will field all inquiries on BOMA's standards including those forwarded from BOMA staff, directly contacted by phone, or through links on the BOMA or Lasertech Web sites. BOMA members and others utilizing this service will also receive interpretations and/or answers to questions on the BOMA standards. All calls that can be answered within approximately 10 minutes will be provided at no cost.

"This agreement brings significant added value to our members and others who have come to rely on BOMA's measurement standards," said BOMA International Chairman and Chief Elected Officer Steven W. Ford, senior managing director, facilities management, Cushman & Wakefield, East Rutherford, N.J. "BOMA offices receive a high volume of inquiries about the standards, and now we can refer those questions to Lasertech Floorplans, one of the most respected industry providers of floor measurement services."

"We at Lasertech Floorplans look forward to assisting BOMA members and other industry participants with using these floor measurement standards to their full advantage" said Steve Orser, president of Lasertech Floorplans. "We will also bring educational seminars to local BOMAs throughout the United States and Canada at their request."

The development of its proprietary LTS Survey Software System has allowed Lasertech Floorplans to become the first to provide nationwide, laser accurate and cost effective as-built floor plans, lease area analysis and related products to the industry. From its trademarked Lasertech Floorplans to the Lasertech Building Report complete with electronic CAD files, Lasertech delivers the complete package—and consistent from coast to coast. Lasertech's ongoing update program ensures that your spacial data remains accurate and current.

Visit Lasertech Floorplans' web site at [www.lasertechfloorplans.com](http://www.lasertechfloorplans.com) to learn more about what they do and how they do it. Founded in 1907, the Building Owners and Managers Association (BOMA) International is a dynamic international federation of over 100 local associations. The 19,000-plus members of BOMA International own or manage over 9 billion square feet of downtown and suburban commercial properties and facilities in North America and abroad. BOMA's mission is to enhance the human, intellectual and physical assets of the commercial real estate industry through advocacy, education, research, standards and information. For more information, please visit the BOMA International web site at [www.boma.org](http://www.boma.org).
